**Hand Serging:**  
Also available:  
• Machine serged  
• Machine bound

**Designer Fringe:**  
*Fringe samples available upon request*

**Hand loomed products are artisanal. Variances are inevitable and are part of its inherent beauty.** Irregular weaving with differences in yarn, striations and shading are the characters that add to the authentic texture you cannot find in machine-tufted products. Variances are not considered manufacturer defects and tolerance must be expected. Our handmade carpets can be made with natural, un-dyed wools that do not allow for exact color consistency. If exact color or shade is needed a CFA (cutting for approval) must be requested.

### CARE & MAINTENANCE:

- **Do not use vacuums with beater bars on these products. Suction only vacuuming is required on these products.** (Beaters bars, especially when set too low, can cause yarn pulls, snags, fuzzing and pile distortion.)
- Chair mats are required under chairs with casters.
- Shedding may happen on all wool or wool blend products and can be removed with light vacuuming, traffic or professional attention.
- **Improper maintenance, such as incorrect vacuum use or abusive traffic, will cause excessive fuzzing and the face of the carpet to distort.**

### BROADLOOM INFORMATION:

**Exact pattern match at seams is not guaranteed. No seam will be 100% invisible.** Side matching a hand-loomed carpet requires a professional installer with prior experience in handwoven goods & shearing/trimming at the seams. Broadloom installed on stairs will not be warranted or considered for claims. Carpet that is cut or installed is not eligible for a claim. Shading, watermarking, roll crush or reverse pile is inherent on handmade carpet and not considered a manufactured defect and will not be eligible for a claim. For more information see warranty guidelines.
